

MeetApp

Group 10

Ankit Yande, William Gunawan, Bo Deng,
Lorenzo Martinez

What is MeetApp?

MeetApp is a solution for the difficulty of organizing events!

It allows you to create events with your friends and family and track where everyone is on event day to make sure everyone is arriving on time and safely.

Motivation

- For large school-hosted events we want to make sure everyone is arriving safely
- For late nights at parties we want to make sure everyone gets home safe.
- Don't want to manually remind people of events
- Bo is always late!

Target Audience

Anyone can use MeetApp, but we think the primary demographic will likely be college students and other young adults.

Features

- Login/ Registration
- Home Screen
- Event Creation Screen
- Event View Screen
- Map View
- Settings Screen
- Social View with Friends + Groups
- Notifications
